The Voyage of the *Birman* 1841

Ray Johanson, Life Member of our Society, has provided a unique perspective from 1841, a Diary written by Surgeon on the barque *Birman*. The ship sailed from Gravesend, London, 13th October, with 157 adults, 96 children and babies, plus crew, arriving Wellington 1st March 1842. On board during the long voyage was Ray's Great Grandparents, **George and Sarah Perkins**, newly married 26th Sept 1841 in Bath, Somerset.

Dr J.R. Motherwell describes his efforts to keep the Emigrant passengers' healthy and their quarters clean. His responsibilities included distributing weekly food supplies, attending to the sick, births and deaths, and acting as chaplain. He found himself settling disputes between couples, individuals, and facing constant challenges from some Emigrants to the ships regulations.

11th October-Emigrants mustered and inspected by the Government Agent and a Mr Allstein. The ship lying at Gravesend, waiting for Despatches.

12th Still waiting at Gravesend, only attended the sick – a few cases Diarrhoea & Coughs Despatches with my instruction received 11pm.

13th Sailed at 6am. A child of the cook diagnosed with measles, and removed to the ship's hospital. The ship spent 8 days in the Downs – a stretch of water outside the Thames Estuary, East of the Kent Downs, wet and stormy.

14th Lying at anchor further up the Downs. Regular cleaning of the area between decks occupied by the Emigrants commenced, "area scraped and well cleaned, sprinkled with Solution of Chloride of Lime." Seasickness affected many, rice water with lime juice and sugar given. Children given boiled rice.

15th Divided the Emigrants into 21 Messes starting at Berth No.1, about 8 per mess, keeping children with parents, to whom food is distributed.

16th to 21st Remained in the Downs with strong winds, wet and stormy; weather very bad.

Routine distribution of food well documented.

I have commenced getting their allowance of Tea Sugar Coffee Butter Suet and Raisins served out weekly. Flour is served twice a week. Rice and Potatoes on the days - according to the Dietary, and Meat daily. My Assistant, Mr Mills takes their allowance to the Steward and then divides it amongst the Messes. A barrel of Pork 50 pieces, and Beef 42 pieces, mustard and pickled cabbage, also ships biscuits, peas and Cannisters of Soup and Bouille (boiled or stewed meat).

Within a week he was writing to the Secretary of the N.Z. Company relative to the allowance of porter (a dark beer) given to "the women giving milk" and regarding the conduct of some Chartrists aboard.

(A Chartrist/Chartist was a member 'mostly work persons' of the Chartist movement 1838-1848 trying to extend the vote in England to workers.) In particular one Chartrist (Mr D) caused him much trouble and confrontation throughout the voyage.

22nd Weighed anchor, but slow progress.

24th Anchored at Motherbank, Isle of Wight.. Being a Sunday the Emigrants were mustered, inspected for cleanliness, divine service read to a thin congregation. His record continues with the routines as above with distribution of food; a full muster and regulations read out every Sunday, followed by Divine Service.

Some dancing and enjoyable events are recorded, relaxing on the deck, dispersed with various incidents. Bedding was aired on the deck whenever weather allowed..

The Voyage of the *Birman ctd.*

Some men were reported beating their wives – a few repeat incidents led to with-holding supplies, and finally to applying handcuffs.

Health concerns and various issues.

23rd Mrs Tanks, safely delivered of a daughter
30th Mrs Phillips, ill since coming aboard, confirmed Phthisis (wasting disease – tuberculosis), and her children a form of TB with enlargement of lymphatic glands in the neck. The Surgeon had understood this family was not to sail in this ship, otherwise he would have objected, and his doubts they would not endure the voyage was warranted. Cases of measles, and diarrhoea mentioned frequently.

1st November - A school for children was commenced on the Poop, Mr Harding Schoolmaster, and his wife in charge of females. Later the volunteer teacher gave up because of unruly children. He observed the parents do not seem to have much control over them. One mother was able to put her children to bed at 8pm, but complained others still up and about. He doubted he could make them go below in fine weather; however all children were off the deck by 9pm, and adults by 10pm. Complaints came of people's food being burnt by the cook. A father complained of another who had struck his children, the offender abusive to the Captain.

3rd There were ongoing issues trying to stop Emigrants cooking in the Galley too early. Orders stated not to cook before breakfast which is served at 8, as per the Regulations – also problems trying to stop late rising, or eating amongst the bedding, unless sick.

4th-10th Mainly rough weather. Rations weighed and given out by Mills, he divides it amongst the 21 Messes, serving his own mess last, and whatever is short is generally given to him by the Captain, as he has confidence in Mill's integrity.

11th A daughter to Mrs Penfold, baptised Esther, on 2nd December.

19th A son to Mrs Morgan. Mrs Chapple's child and another with diarrhoea. 2 with Measles.

20th Mrs Morgan's new son was overlaid and found to have died.

23rd Mrs Tanks, a daughter, baptised Janet.

24th Mrs Chapple's youngest child died.

26th The surgeon commented he believed the Company must have been deceived in the character of some of the immigrants, some married after brief acquaintance for the sake of the free passage. Some refused to assist with tasks, when requested, such as pulling in a sail, or helping with cleanliness.

7th December he decided to take those under 7 or sickly off salt meat dinners and to introduce rice and sugar 3 days, potatoes and butter 2 days, and Soup and Bouille on Sundays and Thursdays. This became very popular with the children and more asked to be included.

8th Mrs Penfolds child Henrietta died after being ill, her baby well - 4 children on boarding.

10th Several ill, Mrs Chapman's child, Mrs George Buck, and Mrs Phillips.

13th Mr. D. with Measles, recovering by 22nd, and allowed some Porter.

16th Appointed Mr Sparks Schoolmaster and Mary Patterson Schoolmistress. Mrs Phillips's children have measles.

23rd Haigh, one of the cooks very ill with Dysentery, and another appointed.

24th The Chartrist's continue to complain, dissatisfied grumblers/ groundless accusations.

25th Christmas day, fine, mustard cabbage with potatoes, a glass of rum for each Emigrant. Mrs Ducks child ill with serious lung infection

26th - Mrs Duck's child died, extensive infection both lungs.

27th - Land sighted, anchored Table Bay Cape Town.

The Voyage of the *Birman* ctd.

28th – 3rd Jan. Cape Town. Out of quarantine – Captain and Surgeon ashore for supplies - no Emigrants ashore. Milk for infants, oranges for the children, bread for the women, fresh meat and vegetables taken aboard. No spirits. Male Emigrants later given a glass of rum each for assisting with supplies. Fresh meat and vegetables served while in port.

Mrs Chapman's child died on 3rd January.

4th January - Put to sea 6am. Most Emigrants seasick. Fine weather over several days.

8th Mrs Tonk's baby heard by Surgeon to give a Croupy cough, which followed a cold, informed it was very serious, became worse overnight and died about 5am next morning.

11th Blowing fresh, weather colder. Mrs Richards child has a cold and lung infection, brought on deck too soon after measles.

12th Mrs Lowndes delivered of a male child, her first. Mrs Richards child worse. Mrs Mills child, sickly since London, much emaciated, feared cannot live long.

14th Rice running out.

16th Mrs Richard's child died. Mrs Lowndes child doing well.

17th Mrs Sargent's child very ill, lung infection after measles. Robert Startup, previous cook caught beating his wife, disrespectful to the Captain, resisted removal, eventually handcuffed, broke doorlock when put in the Men's Hospital, crying then cursing overnight.

18th Startup was sorry the next day. Mrs Sargent's baby rather worse.

19th Mrs Sargent's baby died, the funeral service read and committal followed. Phillip's two youngest children checked by stethoscope when the ship was quiet – lungs so far diseased, not expected to live long.

22nd Mrs Mills child very weak with chronic hydrocephaly.

23rd Sunday very cold and wet, muster held between decks. Mr Mills came to tell his child dying. This the Surgeon had expected, and prepared the parents for. It was the Surgeon's duty as Chaplain to take the funeral service and 'commit the body to the deep'. Next Mrs Torr's child very ill with infection of Lungs.

24th Day wet, blowing hard in evening. Mrs Buck's child has infection of Lungs from Cold.

25th Mrs Torr's child and Mrs Bucks rather better. Mrs Pinfold's infant had convulsions, very ill, now better. One Sailor ill, in fever.

28th Rations required – only half allowance of butter this week, butter nearly expended. No 2 Mess allocated meat had a large bone, and refused to take it. Another mess used it.

31st Robt. Carpenter, fell off the forecastle and broke his left arm a little above the elbow.

29th Youngest Phillips child sinking fast. Died about 12'o'clock on 30th committed to the deep and funeral service read. Fumigated the Berth, and Berths about.

1st February Wind strong but favourable. Some would never bring up their bedding in this weather unless forced, while some few bring them up and shake them each morning. On the 1st fine day plan to make all bedding be brought up, and to fumigate the place.

2nd Wet and Stormy. More fighting between a couple – I hope soon to be done with such troublesome characters. Another couple have also been fighting – wife is very lazy, impossible to get her out of bed in the a.m.

3rd Mrs. R. wished to throw herself overboard. Sent below and threatened to make her fast if she came up again that night. Washing Day. Below scraped, well cleaned and fumigated.

4th Good, all going well except Mr D. – tries every opportunity of annoyance. Found Sailors in the habit of getting into the spirit room.

The Voyage of the *Birman ctd.*

5th Sailor who was ill in Fever, much better.

6th Carpenter's arm going on very well.

7th School in Cabin. Information derived is comparatively little, but keeps children out of harm's way.

8th-10th Weather wet and cold, unpleasant. Many Sailors ill with coughs - chest infections. Although there have been 5 deaths of those entitled to Soup and Bouille, we have no diminution in quantity served.

11th Messes 19, 20, 21 not served Suet as it was expended. Butter allowance served. Half allowance of Raisins, and same weight in Sugar in lieu. Biscuits are given out each day.

12th Mustard and Cabbage for ensuing week served out. Only half allowance of Mustard as expended. Several Sailors unwell, between 30 and 40 Emigrants put their name voluntarily to keep watch in turn and be ready to assist the crew. Mr D was not amongst them.

14th Feb. Porter getting scarce, have put the Women (nursing mothers) on ½ pint daily.

15th Mrs Taylor's infant is very ill.

16th Haight the cook and Monk had a boxing match this morning; separated by the Captain. Monk and Startup sent out at the expense of their Parish in England – it is such characters that all unpleasant annoyances have arisen.

18th Fine day, wind favourable expect soon to get to New Zealand. The Captain wished a half weeks allowance should be served. Raisins expended, same weight in sugar served out.

No suet as none onboard, nor nothing in lieu. The Captain saw Mr. D's sister throwing ships biscuits overboard, when spoken to she was insolent, he said he would stop her biscuits, ... he would not allow them to be thrown away.

19th Wind favourable; saw part of New Zealand. Some complaining lack of suet....'they would have it by force'. However, the Surgeon believed not an ounce remained aboard.

20th Weather fine, wind variable. Muster held, Mr. D. and a few others did not attend – I believe from downright laziness. He also reported another bad container of Soup and Bouille 14 Cases served out, provided by Cope and Co, 'one bad - unfit to be put in the soup'.

21-22nd Weather wet, then blowing hard – worst gale since leaving England. No chance to enter Cook Strait. Half weeks allowance served.

23rd Weather moderate, towards evening calm. Many of the beds on deck this day. Only ½ pint of Porter to nursing mothers and invalids as Porter nearly out. Young Clapham jammed his fingers in a pulley, nails and tops of left hand torn off.

24th Blowing hard, wind against us. Remarkable how well Mr D. and his wife have been living since I stopped his rations. Called last night to stop a fight between a couple.

25th Friday. Blowing hard, wind adverse. Served half a week's allowance of Sugar and Tea – coffee now expended so week allowance of tea in lieu. Sugar in lieu of raisins. Served flour for 2 days. No suet or butter. Porter found to be expended this day.

Mrs Sarah Perkins was safely delivered of a Male child this morning, father George 23, and Sarah 22. The baby was George Perkins (jnr.) born in Cook Strait, elder sibling of Ray Johanson's grandmother, Emma born in 1846.

The Birman arrives in Wellington

26th Weather moderate, attempting to beat up Cooks Strait.

27th Had Emigrants mustered, inspected as to cleanliness. Listed those who did not attend. Did not read divine service as the Captain said he did not know when he would be obliged to tack the Ship, and all Emigrants were looking at their destination. Another bad case of Soup and Bouille found.

28th Through Cooks Strait last night, past Cape Terawhiti South West tip of the North Island We got by mistake into Palliser Bay, when it fell calm. Towards evening a breeze sprung up, we stood off until next morning.....

1st March We anchored in Port Nicholson about 9 o'clock am. Boarded by Customhouse Officer, Quarantine Doctor, and Mr Riddiford, the Emigration Agent. The Captain went on shore and saw Colonel Wakefield, and mentioned the supplies that had expended. The Colonel desired the back rations be given to the Emigrants; which at once acceded to by the Captain.

2nd Commenced to land the Emigrants, gave each of them 2 days rations to bring ashore with them.
